SUMMARY

WP6 related to Communication and Dissemination will guarantee professional and public coverage of the project results and achievements, benefits, and potential deployment via the adoption of a large variety of distribution channels.

Among the different channels, the website stands out, which will not only be a repository of institutional information, but will be considered as a lively tool with continuously updated contents (e.g. press releases, original articles and interviews, posts of project-related news from external sources).

The website will be used as the main interface towards the main stakeholders, who are interested in the work and achievements of BUSLeague, but also towards the public. The project website will include the following features:

- Short description of the project including its aims and results and highlighting the financial support from the Union.
- The production and distribution of press and news releases each time the project will reach a milestone and produce a result that may be of interest for a larger audience.
- A repository for publications (articles, e-newsletters) and project documents (including reports, deliverables, promotional material, etc.).
- The six monthly eNewsletters, which will be distributed not only to web registered users but will be made publicly available on the project website.
- The two brochures, prepared at the beginning and end of the project, reporting its main objectives, as well as the results obtained.
- Articles and interviews around the project and related topics written by professional journalists.
- The set-up and animation of the project Social Media accounts to ensure adequate coverage of project activities on the social networks, aiming at both professional and public networks, thus guaranteeing sustainability of the community also after the termination of the project.
- Cross-linking with and between existing networks and associations and portals of different stakeholders, strengthening the existing BUS-network.
- Links to major websites and portals, including those managed by the European Commission and additional specific initiatives supported by the European Commission.
- Search Engine Optimised (SEO) website which allows better optimization in search engines' ranking.

The url of BUSLeague official website is: <https://busleague.eu/>

The first version of the website went live by M3 (November 2020). The Spanish company "Maniac" was subcontracted to design and program the website with the WORDPRESS Content Management System (CMS). IVE as WP6 leader undertakes the handling of the website as administrator but it will be updated on a regular basis with the cooperation of all partners regarding content provision and site population.

BUS LEAGUE BALANCE PUSH & PULL

ABOUT BUSLEAGUE

BUSLeague is a 30 month-long project funded by the European Union's Horizon 2020 framework programme which started in September 2020.

BUSLeague focusses on a blend of four elements: mutual recognition of energy skills, awareness raising, capacity building and legislative changes.

Workshop on Sustainable energy skills in the construction sector

Horizon 2020
European Union Funding for Research & Innovation

ASM Market Research and Analysis Centre RBM SOLUTION INSTRUCT bimeet LIST HP4ALL TRAIN4SUSTAIN BUS LEAGUE

The BUSLeague project participated in the international conference “Sustainable Places 2020” that this year was held online due to the restrictions derived from the COVID-19 pandemic.

Specifically, Jan Cromwijk from ISSO and coordinator of the BUSLeague project, participated in the workshop entitled «Sustainable Energy Skills in the Construction Sector», which took place on October 28th. Sister projects were also invited to the discussion: INSTRUCT, BIMEET, HP4All, The Nzeb Roadshow, TRAIN4SUSTAIN.

Each project had the opportunity to present its goals, work plan, achievements and share the experience gained so far. Some of the projects have just started, other projects already had the possibility to implement first tasks and activities and therefore it was a very good opportunity to learn about different approaches and activities that will be performed in the coming months and years, one project – BIMEET – has already finished so the workshop was an opportunity to learn about good practices that have worked well and results that have been achieved. Initially, a decision was made to establish a closer collaboration between the projects on the basis of the following activities:
